EDUCATION

University of California, Berkeley

Bachelor of Arts – Cognitive Science, Data Science

Expected Spring 2028

GPA: 3.92

Awards: UC Berkeley College of Letters & Science Dean's Honors List

Relevant Coursework: Computational Structures in Data Science, Principles & Techniques of Data Science, Linear Algebra

EXPERIENCE

ORACLE

Berkeley, CA

AI Consultant

August 2026 – Present

- Build a real-time streaming pipeline on OCI fusing 2 smartphone sensors, targeting sub-second ingest-to-insight latency.
- Develop **pose-estimation and sensor fusion logic** scoring 3 exercises on reps, tempo, range of motion, and form.
- Store time-aligned motion and video data in Oracle Database 23ai for **relational and graph querying on a live dashboard**.

AFLAC INSURANCE

Berkeley, CA

Data Strategy Consultant

January 2026 – June 2026

- Ran **exploratory analysis** on millions of records across 3 Form 5500 schedules and 5 years, profiling 7 key variables.
- Built Python regex pipelines consolidating **1,200+ carrier/broker name variants** into ~280 entities with **96% coverage**.
- Co-designed a GCP workflow converting raw filings into structured datasets with 30+ columns across 5 fiscal years.

UC BERKELEY HAAS SCHOOL OF BUSINESS

Berkeley, CA

Undergraduate Research Apprentice (Prof. Olivia Natan)

September 2026 – Present

- Clean and structure a high-frequency YouTube panel of **3,000+ channels** scraped in R every 6 hours through 2026.
- Write SQL queries in DuckDB joining video, view, and comment data across millions of records for engagement analysis.
- Analyze how detected **AI-generated content shifts view flow** and engagement, and how creators adjust in response.

DATASTORY CONSULTING

Berkeley, CA

Director of Marketing

August 2025 – Present

- Lead recruitment marketing and outreach, supporting review of **200+ applications** for a selective student organization.
- Create video and graphic content using **Adobe, Canva, and CapCut** to drive recruitment and brand visibility growth.
- Collaborate with exec team to design and execute **recruitment strategy**, exceeding **100K** Instagram page views in a week.

THE DAILY CALIFORNIAN

Berkeley, CA

Data Reporter

August 2025 – June 2026

- Reported an investigative grocery price analysis across the East Bay, leading data collection and explanatory reporting.
- Analyzed datasets and interviewed sources to create accessible narratives, partnering with developers on maps and visuals.

PROJECTS

PantryPal — Meal Planning App

June 2026 – Present

An end-to-end meal planning app designed to simplify cooking and grocery planning for college students.

- Conducted **user interviews and usability testing** to identify pain points and iteratively refine a personalized app prototype.
- Developing personalized meal plans and grocery lists based on pantry items, dietary preferences, budget, and cooking time.
- *Tools: Figma, User Research, Usability Testing, UI/UX Design*

Personal Website — Independent Project

January 2026 – Present

A user-focused personal website built to showcase projects, publications, and brand identity.

- Built and deployed a custom **personal website from scratch**, managing version control, hosting, and custom domain.
- Designed **responsive layouts** and user flows with a focus on usability, clarity, and audience engagement across devices.

Patent Law Predictive Dashboard

November 2025 – January 2026

A machine-learning dashboard predicting USPTO approval likelihood.

- Trained XGBoost and Random Forest models on **408K+ USPTO** patent applications with SMOTE, reaching 74% accuracy.
- Built a Streamlit dashboard giving instant allowance estimates across 9 tech centers **before months-long USPTO review**.
- *Tools: Python, Pandas, Scikit-learn, Random Forest Classification, XGBoost, Streamlit, SMOTE, matplotlib*

SKILLS

Technical Skills: Python, SQL, pandas, R, VSCode, JavaScript, NumPy, scikit-learn, Matplotlib, GitHub, Machine Learning

Data/Analytics: Exploratory Data Analysis, Data Visualization, Feature Engineering, Model Evaluation, Predictive Modeling

Design/Creative: Adobe Creative Suite, Microsoft Office Suite (Excel, Word, PowerPoint), Canva, CapCut, Slack

Interests: Dance, Video Editing, Yoga & Wellness, Drawing (charcoals), Graphic Design, Card Making, UI/UX
